Subject: Confidential: draft ATSDR Health Consultation (Dimock)

Dana T.:

In the first attachment, you will find in green text our (Janine and my) feedback following a review of a recently received (June 25th) revised draft version of the subject. Note that the red text were our comments following review of the May version and the blue text represents our comments/input developed and provided from the review of the earlier version (i.e., a couple of months back). The adjustments to the draft ATSDR report and relayed through our green text notes are based on feedback provided to the ATSDR report author through discussion and coordination with R3.

At this time, I believe that we have no additional comments to offer.

I understand that ATSDR is looking to share within the next few days their latest draft version with PA Public Health for their review and comments/input.

I'm also attaching here the above mentioned latest draft of the subject report. It is provided in two separate files (one is ATSDR's own compare version and the other one is a their clean version).

Let me know if there are any questions.
